A folding automobile bed invented by an Oakland, Cal., man makes it possible for parties touring by auto to travel at comparatively light expense. The bed consists of a small light frame to which is attached a canvas. When the bed is opened, the canvas is stretched tightly and projects over the front seat for a footrest. The whole thing folds compactly and with the necessary bedding takes up but little space. Only a few minutes are required in transforming the auto into a sleeping berth and in the morning the equipment is quite as readily packed for travel.

Railroad employees, stock shippers and newspaper employees are now the only people who have a legally recognized right to risk being killed by walking on the railroad track. If anyone else takes the hazard he lays himself liable to arrest and fine or imprisonment. Now watch and see how far this goes toward making pedestrians in the country sensible.

An appeal for smoking tobacco for the Belgian soldiers in the trenches has met with generous response. One touch of nature makes the whole world kin, and the thought of one man wanting a smoke and unable to get one, sends a pang of sympathy to every other man's heart.

Someone asks what has become of the people who could formerly be entertained for hours by asking and answering conundrums. Well, they are too agitated to go out much now and their children find eating Welsh rarebits less fatiguing to their overstrained intellects.

The German government is now meditating an attack on fashions to prevent too much cloth going into stylish gowns when it is needed for the army. Here is where patriotic appeal to women is going to have the worst tug of all.

Why Pay GOOD MONEY FOR POOR COAL ?

All coal will burn, but not all will burn up clean and leave only the fine ashes, as the higher and better grades do. Therefore the cheaper grades are more expensive than the High Grade Coal. The best is always the BEST. We sell that kind and solicit your patronage.
